

## **Jack M. Frost**

Jack M. Frost (62) has an extensive background in business and executive management. After receiving his BS in Chemistry and serving in the US Army during Vietnam, Mr. Frost started in medical electronics with Del Mar engineering in Irvine, California. He left the position of General Sales Manager to form AdvanceMed, Corporation, which was later sold to American Edwards. Mr. Frost has created 6 additional start-up companies that have been successfully taken public in the USA and abroad, merged or sold.

In 1976, he formed a partnership in Columbia, Maryland with Oxford Instruments, a UK based company, to bring their medical products into the USA.

In 1979 Mr. Frost sold his interest in the USA operation to Oxford Instruments, and moved to the UK as a shareholder, Executive Board Director of Oxford Instruments and President/CEO of the worldwide Medical Division. He was instrumental in taking the company public in 1984 on the London Stock Exchange. Oxford invented and patented super conducting magnet techniques and was the largest supplier of super conducting magnets for MRI systems in the world.

Mr. Frost left as CEO of the Medical Division in 1997 and became President of Oxford Instruments, Inc. in the USA. He retired from Oxford this year and has started two companies in the construction industry.
